Figure No. **YR-1-19** Sheet 19 of 19

Title: **Dawson City and Klondike Valley Flood Mapping Study
Composite Flood Hazard Map - Yukon River
1% Annual Exceedance Probability (AEP)**

Client/Project:
**Government of Yukon
Department of Environment
Water Resources Branch**

Project: 123222713

Project Location: Dawson, Yukon

Prepared by MANDERSON on 2026-04-03
Requested by JMUIRHEAD on 2024-03-30
Review by JMUIRHEAD on 2026-04-03

- River Flow Direction
- Tr'ondék Hwéch'in Settlement Land
- Highway Kilometer Post
- Approximate 50% AEP Open Water Flood Inundation
- Cross-Section Number
WSE (m) Along Cross Section
- Inundation Under Modelled Open Water Runs
- Major Contour (5m)
- Inundation Under Modelled Breakup Ice Jam Runs
- Minor Contour (1m)
- Composite Open Water and Ice Jam Inundation Extents
- Surveyed Cross-Sections Used in Hydraulic Model
- Potential Presence of Ice Debris During Jam Scenario
- Limit of Flood Hazard Mapping
- Ice Jamming Extents

Map Publication Date: 04/03/2026

0 50 100 150 200 250 m

(At original document size of 11x 17) 1:5,000

Notes

- Coordinate System: NAD 1983 CSRS UTM Zone 7N Vertical Datum: CGVD2013, Geoid: CGG2013a
- Data Sources: GeoYukon, Canada Lands Survey (CLS) CCM 982, CANVEC
- Flood hazard extents shown on these maps are based on LIDAR collected in July, 2019 and topographical and bathymetric data that was collected in June and September 2024.
- 50% AEP inundation lines are based on the 50% AEP flow estimate simulation in the hydraulic model which has been calibrated for higher AEP flood events and therefore should be considered approximate.
- The content of these Composite Flood Hazard Maps is based on the methods, assumptions, limitations, and analysis documented in the Dawson City and Klondike Valley Flood Mapping Study produced for Yukon Government. Composite Hazard Maps are based on the available data which is current to the time the maps were produced. Such data contains inherent limitations given that the climatic conditions and geomorphic conditions are constantly evolving and cannot be predicted with certainty.
