**NOTES:**

1. AEP corresponds to the Annual Exceedance Probability.
2. Inundation extents are based on LiDAR based elevation model from October 2019, when the LiDAR data was captured. LiDAR data provided by Yukon Government and validated by Natural Resources Canada. Changes to the ground surface after October 2019, or temporary flood protection works that were removed prior to October 2019 are not represented in the inundation extents.
3. Ground surface representation is provided at a 1m spatial resolution. Features smaller than this resolution may not be well-represented.
4. Imagery provided by ESRI, captured on July 20, 2021.
5. Average annual peak water level inundation extent based on 2004 aerial photos provided by the Yukon Government.
6. This project is funded in part by the Government of Canada.
