	Average Annual Peak Water Level Inundation Extent
	5% AEP Flood Inundation Boundary
	Potential Additional Inundation Due to Wave Runup for the 5% AEP Flood
\square	First Nation Settlement Lands - Surveyed

⇒

- NOTES:
 1. AEP corresponds to the Annual Exceedance Probability.
 2. Inundation extents are based on LiDAR based elevation model from June 2022, when the LiDAR data was captured. LiDAR data provided by Yukon Government and validated by Natural Resources Canada. Changes to the ground surface after June 2022, or temporary flood protection works that were removed prior to June 2022 are not represented in the inundation extents.
 3. Ground surface representation is provided by tareat were removed prior to June 2022 are not represented in the inundation extents.
 4. Imagery provided by ESRI. Capture date July 24, 2017.
 5. Average annual peak water level inundation extent based on 2014 aerial photos provided by the Yukon Government.
 6. This project is funded in part by the Government of Canada.
